PROJECTS

Beeto Express - food delivery application. (05/2021 - Present)

- <https://play.google.com/store/apps/details?id=uz.invan.beetoexpress>.
- Not finished yet. There is some work to be done.

Info group (06/2021 - 09/2021)

- <https://play.google.com/store/apps/details?id=uz.invan.iggroup>

Agent - Application for agents that deliver cheese products to groceries (07/2021 - 09/2021)

- <https://play.google.com/store/apps/details?id=uz.invan.agent>
- Application works both online and offline. If there is no internet orders are cached in sqLite database using Room persistent library and synchronized as soon as internet available

Reduz Moderator - Moderator application for Registon study center (08/2021 - 08/2021)

- Not published to google play

Assalom Agro-Team project. I work at some parts. (04/2021 - 07/2021)

- <https://play.google.com/store/apps/details?id=uz.gardens.app>

Homespot - Application for homespot.uz that sells construction materials for home (07/2021 - 08/2021)

- Not published to google play yet

WMS - Application for using inside Homespot warehouse. (10/2021 - 10/2021)

- Items can be found by bar code, added or edited by QR Code.
- Firebase ML Kit was used for scanning items.
- Application not published to Google play and only used locally inside the warehouse of Homespot with local IP address.

Stylus - Application for barbers and clients. Team project that I work at some parts (02/2021)

- Not published yet

Avtoservice.KZ - team project that I work at some parts (06/2020 - 10/2020)

- <https://play.google.com/store/apps/details?id=app.autoservice.kz>

Namozxon - team project that I started with university groupmates as volunteers (12/2020 - 12/2020)

- Prayer times of Uzbekistan regions with minimalist design. Preparing for initial release in MVP (Minimum Viable Product). There are plans of adding functionalities to the app.

Freelance

I work with a team as a freelancer in projects

06/2020 - 02/2021

Android Developer

Anor Systems

02/2021 - 11/2021

Tashkent

SKILLS

OOP principles

Database: SQLite

ORM: Room

VCS: Github, Gitlab

Architecture patterns: MVP, MVVM, Clean Architecture

Programming languages: Java, Kotlin

Android Architecture components: LiveData, Paging

WorkManager, Navigation, ViewModel

Kotlin Coroutines

Rest API, Retrofit2, Firebase (Push notifications, analytics, crashlytics...)

Dependency injection: Dagger2, Hilt

Custom View, Testing

Server Driven UI

ACHIEVEMENTS

Learned Android development in PDP IT Academy

CERTIFICATES

IELTS 6.5 (04/2017)

LANGUAGES

Uzbek

Native or Bilingual Proficiency

English

Professional Working Proficiency

Russian

Elementary Proficiency
